Default Session
No test case for network connectivity loss during payment processing.
Missing scenario for duplicate payment detection when the same request is submitted twice.
Suggestions:
Add a test case that simulates network interruption after OTP entry to verify graceful failure and retry mechanisms.
Include a test case to submit the same payment request consecutively and verify that the system prevents duplicate transactions or flags them appropriately.

Test Case ID: TC_ICICI_001 Title: Verify successful NEFT transfer within daily limit Preconditions: User is logged in to ICICI net banking; beneficiary is added and verified; daily NEFT limit not exceeded Steps:

1. Navigate to "Fund Transfer" → "NEFT".
2. Select beneficiary from the list.
3. Enter transfer amount within daily NEFT limit.
4. Choose "Immediate" transfer option.
5. Click "Proceed".
6. Confirm transaction details and enter OTP.
7. Submit the transfer. Expected Result: Transfer is processed successfully, reference number is displayed, and transaction appears in the account statement.

Test Case ID: TC_ICICI_002 Title: Verify IMPS transfer fails when amount exceeds per-transaction limit Preconditions: User is logged in; beneficiary is added; per-transaction IMPS limit is ₹2,00,000 Steps:

1. Navigate to "Fund Transfer" → "IMPS".
2. Select beneficiary.
3. Enter amount greater than ₹2,00,000.
4. Click "Proceed".
5. Observe validation message. Expected Result: System displays error "Amount exceeds IMPS per-transaction limit" and prevents proceeding.

5. Click "Proceed".
6. Enter OTP and confirm. Expected Result: Transfer is queued for RTGS, confirmation message with RTGS reference ID is shown, and transaction is reflected in the statement after settlement.

Test Case ID: TC_ICICI_004 Title: Verify UPI transfer using VPA with invalid OTP Preconditions: User is logged in to ICICI mobile app; UPI ID (VPA) of beneficiary is saved; sufficient balance available Steps:

1. Open "UPI Transfer" in the app.
2. Enter beneficiary VPA.
3. Enter valid transfer amount.
4. Click "Send".
5. When prompted, enter an incorrect OTP. Expected Result: System rejects the transaction, displays "Invalid OTP" error, and no funds are debited.

Test Case ID: TC_ICICI_005 Title: Verify internal account-to-account transfer between user's own accounts Preconditions: User is logged in; both source and destination accounts are linked to the same user profile; daily internal transfer limit is ₹5,00,000 Steps:

1. Navigate to "Transfer Between My Accounts".
2. Select source account.
3. Select destination account.
4. Enter amount within daily internal limit.
5. Click "Transfer".

4. Click "Send".
5. When prompted, enter an incorrect OTP. Expected Result: System rejects the transaction, displays "Invalid OTP" error, and no funds are debited.

Test Case ID: TC_ICICI_005 Title: Verify internal account-to-account transfer between user's own accounts
Preconditions: User is logged in; both source and destination accounts are linked to the same user profile; daily internal transfer limit is ₹5,00,000 Steps:

1. Navigate to "Transfer Between My Accounts".
2. Select source account.
3. Select destination account.
4. Enter amount within daily internal limit.
5. Click "Transfer".
6. Confirm the transaction. Expected Result: Transfer completes instantly, confirmation screen shows transaction ID, and both accounts reflect updated balances.

Review Summary: N/A
Findings: No test cases were provided for review.
Gaps Identified: N/A
Suggestions: Provide the test cases you wish to have reviewed.
